Actions (cs.actions): 15.2.1

Release 15.4.0.2

CONTACT Software

Mar 23, 2018

Contents

1 What's New in cs.actions 15.2.0? 1
1.1 Internationalization 1

2 What's New in cs.actions 15.2.1? 2
2.1 New plugin for CONTACT Tasks 15.3.0 2

CHAPTER 1

What's New in cs.actions 15.2.0?

1.1 Internationalization

CONTACT Elements 15 and its applications contain many newly translated and updated terms. The following paragraphs list all affected elements in this application, while details concerning the actual conversion (called "internationalization" for simplicity) can be found in each product's release notes.

1.1.1 Translated Status Names

Status names have been internationalized for the classes:

- Action (`cdb_action`)
- Status Protocol Action (`cdb_action_prot`)

1.1.2 Translated Catalogs

The following catalogs already supporting multiple languages are updated as detailed in the product release notes:

- **Responsibles (`cdb_action_resp_browser`), used in**
  - Action (`cdb_action`)

Note: The attribute `subject_name` was removed from the class Action (`cdb_action`). If the attribute was used in your customizing, its usages have to be adapted accordingly.

CHAPTER 2

What's New in cs.actions 15.2.1?

2.1 New plugin for CONTACT Tasks 15.3.0

cs.action 15.2.1 contains a new plugin for the new release 15.3.0 of CONTACT Tasks (cs.taskmanager). For details please read the release notes of cs.taskmanager 15.3.0.
