## What's New in cs.base 15.2.0?

---

### 1.1 Internationalization

CONTACT Elements 15 and its applications contain many newly translated and updated terms. The following paragraphs list all affected elements in this application, while details concerning the actual conversion (called “internationalization” for simplicity) can be found in each product’s release notes.

#### 1.1.1 Translated Catalogs

The following catalogs already supporting multiple languages are updated as detailed in the product release notes:

- **Day Type (`cdb_day_type`), used in**
  - Calendar Profile (`cdb_calendar_profile`)
  - Calendar Exception (`cdb_cal_prof_exc`)
  - Calendar Entry (`cdb_calendar_entry`)
- **Batch Operation Configuration (`cdbbop_typedef`), used in**
  - Batch Operation (`cdbbop_operation`)
- **Batch Operation Definition (`cdbbop_opdef`), used in**
  - Batch Operation (`cdbbop_operation`)

## CHAPTER 2

---

### What's New in cs.base 15.2.1?

---

For technical reasons a new version of cs.base is necessary to support the new CONTACT Elements 15.1 version.

---

### What's New in cs.base 15.4.1?

---

#### 3.1 Audit Trail

*Audit Trail* is a component for capturing and comparing changes to business objects. In addition to capturing creation of objects, modifying and deleting, status changes can also be recorded (if the object has a status log). If desired the *Audit Trail* can replace the change and status log.

#### 3.2 Semantic Links

Enhanced the functionality of the *Link Graph* with filter options for objects and semantics, added additional object detail information and an overall better performance.

## CHAPTER 4

---

### What's New in cs.base 15.4.2?

---

For technical reasons a new version of cs.base is necessary to support the new CONTACT Elements 15.3 version.

---
