
Engineering Changes (cs.ec): 15.2.0

Release 15.4.0.9

CONTACT Software

May 24, 2018

1	What's New in cs.ec 15.2.0?	1
1.1	Change Notifications	1
1.2	Internationalization	1
1.3	Change Notifications	2
1.4	Miscellaneous	2

What's New in cs.ec 15.2.0?

1.1 Change Notifications

All classes related to Document Change Notifications have been relocated from *CONTACT Engineering Changes* to *CONTACT Documents*:

- Change Notification (Document) (aenderung)
- Change Type (cdb_mod_kind)
- Change Cause (cdb_mod_event)
- Change Source (cdb_mod_source)

This is also true for the Powerscript class DocumentECN, which was relocated from `cs.ec_documents` to `cs.documents`.

1.2 Internationalization

CONTACT Elements 15 and its applications contain many newly translated and updated terms. The following paragraphs list all affected elements in this application, while details concerning the actual conversion (called “internationalization” for simplicity) can be found in each product’s release notes.

1.2.1 Translated Catalogs

The class Engineering Change (cdbecm_ec) has been updated due to the following internationalized catalogs that are part of `cs.documents`:

- Change Cause (cdb_mod_event)
- Change Source (cdb_mod_source)
- Change Type (cdb_mod_kind)

1.2.2 Internationalized Catalogs

These classes had their `name` attributes internationalized:

- Change Category (cdbecm_ec_categ)
- Part Maturity Level (cdbecm_maturity)

Their usages in the following classes have also been internationalized:

- Engineering Change (cdbecm_ec)
- Part (part)

These classes had their `subject_name` attributes internationalized:

- Engineering Change (`cdbecm_ec`)

1.2.3 Translated Status Names

Status names have been internationalized for the classes:

- Engineering Change (`cdbecm_ec`)
- Status Protocol Engineering Change (`cdbecm_ec_prot`)

1.3 Change Notifications

All classes related to Document Change Notifications have been relocated from *CONTACT Engineering Changes* to *CONTACT Documents*:

- Change Notification (Document) (`aenderung`)
- Change Type (`cdb_mod_kind`)
- Change Cause (`cdb_mod_event`)
- Change Source (`cdb_mod_source`)

This is also true for the Powerscript class `DocumentECN`, which was relocated from `cs.ec_documents` to `cs.documents`.

1.4 Miscellaneous

The following configuration objects were removed, as they are not used anymore:

- The attribute `c_resonsible` in class Engineering Change (`cdbecm_ec`)
- The catalog `cdbecm_ec_statenames`
