
OfficeLink (cs.officelink): 15.5.0

Release 15.5.0.9

CONTACT Software

Sep 25, 2018

1	What's New	1
2	History	2
2.1	15.5.0.9	2
2.2	15.5.0.8	2
2.3	15.5.0.7	2
2.4	15.5.0.6	3
2.5	15.5.0.5	3
2.6	15.5.0.4	4
2.7	15.5.0.3	4
2.8	15.5.0.2	4
2.9	15.5.0.1	4

What's New

- 15.5.0.0

- New Microsoft Project interface

A new interface between CONTACT's project management and Microsoft Project has been developed, mainly based on the XML format of Microsoft Project. From now on the old Microsoft Project interface shipped until cs.officelink 15.3 is no longer supported. For further information please see the manuals of *Projects* and *OfficeLink*.

- Server-side and thus customizable evaluation of document variables via the modes *rs*, *ws* and *rws*.

History

2.1 15.5.0.9

- Bugfix [E048456]: Exception in cs.officelink when creating serverside PDF PowerReports

2.2 15.5.0.8

- Bugfix [E047826]: DCS/Metadata sync: Conversion job fails when a document variable references an object without 'cdb_classname' attribute
- Bugfix [E047826]: DCS/Metadata sync: Conversion job fails when new config file 'etc/officelink.conf' is missing
- Bugfix [E047836]: PDF converter option _shellexecute not working when running DCS server in VM
- Bugfix [E047737]: Docs: Use english code example comments (instead of german)
- Improvement [E047783]: Extend documentation about DCS server (+ mso plug-in) setup
- Improvement [E034688]: PowerReports: Document missing mapped attributes in XML schema when only returning relation name instead cdb.objects class via getSchema in CustomProvider
- Improvement [E017291]: PowerReports: Document how to use a RuleProvider with report dialog and object rule variables
- Improvement [E047712]: PowerReports: Add default provider parameter "MaxRowsTruncate" (Documentation only; Feature requires CE 15.3 resp. cs.powerreports 15.3.0.1!)
- Improvement [E015990]: PowerReports: Add provider parameter "OrderBy" for provider type "RuleProvider" (Documentation only; Feature requires CE 15.3 resp. cs.powerreports 15.3.0.1!)

2.3 15.5.0.7

- Bugfix [E047598]: Docs: Explain Microsoft Windows usage of "Certificate Revocation List" and its possible slow down of the OfficeLink load time
- Bugfix [E047586]: PowerPoint: OfficeLink menubar sometimes grayed out when closing presentation mode
- Bugfix [E038157]: DCS/Ghostscript: Exception when creating bookmarks with non-ASCII characters
- Bugfix [E047579]: DCS/Ghostscript: pdfconverter.conf option "bookmark_attr" not evaluated
- Bugfix [E047575]: DCS/Ghostscript/PowerPoint: Exception when creating PDF bookmarks
- Bugfix [E047387]: OfficeLink 32 bit not installable when Office 64 bit was installed in the past

- Bugfix [E045907]: PowerReports: CDB hyperlink texts are interpreted as numbers and get modified by Excel (e.g. “0500.330” into “500330”)
- Bugfix [E047368]: Configuring Excel as a viewer in CDB results in an inactive OfficeLink (e.g. not filled PowerReports)
- Bugfix [E047358]: Metadata sync: Relationships with empty description field (label) can’t be used
- Bugfix [E034184]: Metadata sync (Word): Document that table headers in footers or headers should be locked via CTRL+F11 for proper PDF conversion
- Improvement [E020048]: Outlook: Implement add-in side duplicate check for mails (.msg)
- Improvement [E038346]: Improve error message when edited document is below a WSM workspace structure
- Improvement [E034456]: Unhide hidden message dialogs (e.g. “Document has been updated.”) via options dialog
- Improvement [E038600]: Docs: Info on how to re-enable fully disabled add-in
- Improvement [E045342]: Docs: Clean up and extend comments in pdfconverter.conf
- Improvement [E029807]: Support option “PDF/A” for PowerPoint to PDF conversions (pdfconverter.conf)
- Improvement [E044865]: Metadata sync: Helper button for changing document variable values (Word only)
- Improvement [E033937]: Skip file format dialog on pressing “Create Document” when file is already locally saved
- Improvement [E028041]: Metadata-Sync: Improve error handling when writing to non-existing referenced object
- Improvement [E039448]: Don’t log ERRORS on missing settings in registry
- Improvement [E040396]: Improve error message on missing CAD configuration “Allow Metadata Manage/Write”
- Improvement [E044828]: Docs: Add note about disabling antivirus for Outlook conversions
- Improvement [E044505]: Docs: Add note about general macro settings for PDF conversions (in the Office Trust Center)
- Change [E047248]: Temporarily remove PDF admin manual

2.4 15.5.0.6

- Bugfix [E047256]: PowerReports: Exception with complex row reports and row heights exceeding 409
- Improvement [E017618]: Visio: Support meta data synchronization
- Improvement [E044746]: Metadata sync: Disable screen updating in Excel in order to increase performance

2.5 15.5.0.5

- Bugfix [E046525]: Exception when creating new document with document class property ‘Filename template’=‘cdb_file.cdbf_original_name’
- Bugfix [E046035]: Metadata sync: Variable property “.numeric” not working for serverside reading variables
- Bugfix [E045629]: Move system requirements from OfficeLink docs to Product Support Matrix
- Bugfix [E018263]: DCS/Metadata sync: Auto fill document variables when converting to PDF
- Bugfix [E045927]: Excel can not be activated in embedded mode (e.g. activating an Excel sheet in Word)

- Changed [E045993]: MSPXML: Move cs.officelink.component.OfficeLinkComponent.MSP_UPDATABLE_ATTRIBUTES to cs.pcs.msp.imports.XmlMergeImport.TASK_UPDATABLE_MSP_ATTRS (only for cs.pcs 15.4.2)

2.6 15.5.0.4

- Bugfix [E045630]: MSPProject: Plan can not be published when task notes contain non-XML-valid characters (e.g. vertical tabs)

2.7 15.5.0.3

- Bugfix [E045373]: MSPProject: “Update attributes” only working for Text* and Number* fields, not for normal (non-extended) fields
- Bugfix [E044154]: MSPProject (XML): Empty MSP tasks not correctly handled (partly imported as summary tasks)
- Improvement [E044895]: MSPProject: Allow empty tasks (blank rows between two tasks)
- Improvement [E044770]: Metadata sync: Add default handler for server-side variables

2.8 15.5.0.2

- Bugfix [E044362]: PDF converter option _shellexecute not always working
- Improvement: Update release notes and documentation

2.9 15.5.0.1

- Bugfix [E043631]: Metadata Sync (Excel): Variable values not updated when document contains duplicated/orphaned variables
- Improvement [E043384]: Metadata Sync: Support server side reading/writing of document variable values
